Full-Stack Engineer & Business Analysis

- **Stakeholder & Requirement Analysis:** Owned end-to-end business analysis—conducting client requirement gathering, feasibility assessment, technical proposal writing, and managing a **30-day MVP roadmap** from concept to production.
- **Workflow & State Modeling:** Mapped end-to-end user journeys and modeled a **4-tab Finite State Machine (FSM)** to automate license plate lifecycles, paired with a custom **valuation rule engine** analyzing **1.1M+ national auction records** (830K+ plates, 290K+ bids).
- **Data Architecture & Implementation:** Structured **61 relational PostgreSQL entities** to support complex multi-filter search queries (<8ms via GIN indexing) and built the system using **.NET 8, React 19, and Docker**.

Team Lead, Business Analysis & Quality Assurance

- **Business Analysis:** Identified **6 operational bottlenecks** in agency campaigns (scattered tools, scope changes lost in chat, brand voice drift) and refined **109 raw requirements into 141 atomic FRs**, replacing chat negotiation with a **Package → Campaign → Task** flow and a 3-step approval sequence.
- **Technical Solution: Led a team of 5** on a 4-service system: **RabbitMQ** for reliable publishing to 4 social platforms, **RAG** to keep AI captions on-brand, and a **79-screen React Native app.**
- **Quality Assurance:** As Test Lead, enforced a **spec → plan → task → test** workflow, documented **2,500+ test cases**, and backed them with **320+ automated test files**, Playwright E2E and CI/CD.
